Many Canadians rely upon Natural Health Products for their health.

These products are endangered and consumers need to act now to save them.

Under Bill C-51, NHPs are subject to strict licensing requirements.

Unfortunately, 60% of these license applications have failed, and at least 75% are expected to fail.

This means that 75% of the NHPs Many Canadians rely upon could become **illegal**.

This bill will:

- Outlaw nearly all Natural Health Products
- Criminalize the use of herbs
- Favour drug & medical treatments
- Ignore your Constitutional Rights
- Impose laws from other countries on Canadians
